

ENTERING AND LEAVING MECHANICSBURG SPORTSMEN'S ASSOCIATION CLUB GROUNDS

FIGURE 1: GATE READER INBOUND

FIGURE 2: GATE READER OUTBOUND

Pull up next to the reader with your vehicle's window as close to the reader as possible.

Hold the FOB in place within 18" of the center of the reader - DO NOT wave the FOB around.

When the FOB is recognized the light on the reader will turn from red to green and you should also hear a 'beep'.

BE PATIENT - THIS PROCESS IS NOT INSTANTANEOUS. It may take a few to several seconds for (1) the reader to identify your FOB, (2) verify the information on the club's server, (3) receive the authentication back from the server, and (4) activate the gate motor.

If you do not get a green light on the reader after approximately 10 seconds you will have to move the FOB closer to the reader until the light turns green.

Proceed carefully through the entrance after the gate is raised. The gate will automatically close behind you.

CAUTION: If the gate opens and you do not proceed through, the gate will automatically close and you will have to wait at least 60 seconds until the FOB can be read again. **DO NOT** continue to hold the FOB in front of the reader during this time as this will only prolong your wait.

ENTERING MECHANICSBURG SPORTSMEN'S ASSOCIATION CONTROLLED ACCESS AREAS

FIGURE 3: ARCHERY/.22 CLUB HOUSE READER

FIGURE 4: INDOOR PISTOL RANGE READER

If you have purchased annual access to the ARCHERY/ .22 RANGE or the INDOOR HIGH POWER PISTOL RANGE, your FOB has been programmed to provide entry to these areas.

Hold the FOB in place within 3" of the center of the reader - DO NOT wave the FOB around.

FIGURE 5: CLOSEUP OF CLUB HOUSE READER

When the FOB is recognized the light on the reader will turn from red to green. If your FOB is programmed for entry you will hear a 'CLICK' when the latch opens. You can now open the door.

NOTICE: You will still get a green light even if your FOB is not programmed to open the door.

BE PATIENT - THIS PROCESS IS NOT INSTANTANEOUS. It typically takes a second or two after the light turns green for the latch to release.

If you do not get a green light on the reader after approximately 5-10 seconds you will have to move the FOB closer to the reader until the light turns green.

CAUTION: If the door opens and you do not proceed through, the door will automatically relock and you will have to wait at least 60 seconds until the FOB can be read again. **DO NOT** continue to hold the FOB in front of the reader during this time as this will only prolong your wait.
